POTTERY AND TOOLS:

BISQUE:

Gare 3018 Square Rim Platter

PYOP STUDIO STUFF SUPPLIES:

Big Ass Screen Get Stuffed Silkscreen

SUPER SIMPLE STEPS:

1. Water down your Cream, Light Green, and Dark Green paint, by using 50% water to 50% paint.
2. Paint the center of the plate with 3 coats of Cream using a fan brush, paint it up slightly onto the edge of the rim. While the paint is still wet, start painting in the Light Green on the rim and let it blend down into the cream. While the Light Green is still wet, work 2 coats of Dark Green to the outside of the rim and allow it to blend into the Light Green.
3. Screen the turkey part of the silkscreen on to the center of the plate using Dark Brown goo.
4. Screen on the words from the silkscreen using Maroon goo.
5. Paint in one heavy coat of white, green, and maroon, to the design. For the accents on the turkey, just one coat of Light Brown is all you need.
