### SUPER SIMPLE STEPS:

1. When using Big Ass Screens, we like to rinse them in warm water and pat them dry. This makes them flexible and easier to screen. Use Black goo and screen on your design to the platter.

2. Using a fan brush, paint 3 coats of Blue to the edge of the platter.

3. Fill in the designs with one heavy coat of your desired colors using a detail brush.

4. Use the back end of your detail brush dipped in Red paint to create the dotted border around the inside of the edge.
